## SOFTWARE ENGINEER

Final-year BSc Information Technology (Software Engineering) student with practical experience developing desktop, mobile, and web applications through academic, personal and freelance projects. Skilled in Python, Java, PHP, JavaScript, SQL, and object-oriented programming and database development. Experienced in applying software engineering principles including testing, debugging, error handling, logging and design patterns. Seeking a developer opportunity to contribute to real-world development while continuing to grow technical skills.

## TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, PHP, C++, SQL
- **Operating Systems & Virtualization:** Ubuntu Linux(Bash, permission services), Windows Server 2019(AD, DNS, DHCP, User Management), VirtualBox, Hyper-V
- **Backend & APIs:** Node.js, Express, REST API design, FastAPI, Django, role-based access control, webhooks
- **Web & Mobile Development:** React Native (Expo, TypeScript), Android (Java, XML), HTML5, CSS, Bootstrap
- **Databases:** MySQL, SQLite, MongoDB (schema design, migrations, transactions)
- **Integrations & Security:** Yoco payments, Resend email, Google Maps API, scrypt password hashing, HMAC signature verification
- **Tools:** VS Code, Android Studio, NetBeans, PyCharm, Git, GitHub, Docker Desktop
- **Enterprise Software Development**: OOP, Enterprise Application Development, 3-Tier Architecture, MVC design patterns
- **Software Engineering:** Unit testing, Debugging, Error handling, Logging, Performance Profiling, Threading, Problem Solving

## TECHNICAL PROJECTS

**Ms_Thoxie Clothing Store |Freelance**

- Built an e-commerce website for a real customer (freelance).
- Implemented user authentication.
- Integrated a MySQL database.
- Developed shopping cart functionality.
- Implemented email functionality and Responsive interface.
- **Technologies used:** HTML5, CSS, JavaScript, Supabase.js
- **Tool:** VS code
- **link:** www.msthoxie.online

**DigitalMarketingSA**

- Built a C2C marketplace for second-hand electronics.
- Implemented user authentication and profile management.
- Developed an AI agent and Google Maps APIs.
- Developed a product list, search, seller and buyer features/functionality.
- Integrated a MySQL database.
- Shopping cart and responsive interface.
- **Technologieas used:** HTML5, PHP, CSS, JavaScript, MySQL.
- **Tool:**VS code
- **link:** digitalmarketing121.infinityfreeapp.com

**Bugzot Enterprise Training Management System**

- Built a Python or Tkinter desktop application for training management.
- Implemented learner registration, course management, support tickets, assessments, and reporting with GUI.
- Applied OOP and design patterns (Singleton, Factory, Strategy).
- Added concurrent registration processing, logging, unit tests, threading and profiling.
- **Technologies used**: Python, Tkinter, Threading, Logging, unittest, cProfile.
- **Tool:** PyCharm

**The Tapas Pub & Grill | Full-stack mobile and web app**

- Built a restaurant app with a React Native front end and a Node.js/ Express REST API.
- Implemented table booking with live availability and double-booking prevention.
- Integrated Yoco card payments with secure webhook verification.
- Implemented secure authentication, password reset and role based access(customer, staff, manager).
- Added email notifications and a manager dashboard for menu, orders and bookings.
- Designed a MySQL database and wrote unittests.
- **Technologies used:** React Native, Expo, TypeScript, Node.js, Express, Yoco, Resend, Docker Desktop, Supabase.js.
- **Tools:** VS Code, Git, GitHub.
- **Link:** https://tapasbar-pub-expo.expo.app/

**TripBuddy|Android mobile app**

- Built a trip planning and memories app in Java and XML with a local SQLite
- Implemented secure authentication with salted password hashing and sign-in lockout.
- Applied a layered architecture with background threading and optimistic locking.
- Added trip history with pagination, input validation and unit tests.
- **Technologies used:** Java, Android(XML), SQLite, Threading, JUnit.
- **Tools:** Android Studio, Git, GitHub.
- **Link:**github.com/43011144/TripBuddy-Mobile-App.

---

**ACCOMPLISHMENT:**

- I was formally recognised by Golden Key as one of the top 15% in my field.
- I was a group leader for ITPFA1(Non-Technical Skills for IT) and got 83%.
- I have achieved 83% for Web development(ITECA3) .
- I have achieved 92% for Python(ITAPA2).
- I achieved 86% for Database Systems (ITDSA2).

---

## EDUCATION

**Eduvos** **2026**

BSc IT (Software Engineering)

Educators high school **2021**

National Senior Certificate(NSC)
